Rochester Intermodal Transportation Center Scoping Study

Public Information Open House

On behalf of the City of Rochester in cooperation with the Federal Railroad Administration and the New York State Department of Transportation (NYSDOT), we invite you to attend a public information open house for this study.

Please join us.

Drop in at any time during the open house to view study information, talk to the design team, and provide your input on the vision for a future Intermodal Transportation Center.

What's a scoping study?

A scoping study is one that explores the range of natural and community resources near a proposed new facility and examines the possible effects to those resources of building the project as well as the range of things to consider during facility design.

The end product of this study will be a scoping document, a report that lays the foundation for final design, construction, and occupancy of an Intermodal Transportation Center. A project goal is to make recommendations that will catalyze development in and around the site, while enhancing the public transportation experience of those who live work and visit in the City of Rochester.

Learn more in advance.

For more information about the study, please contact:

Thomas Hack,
City of Rochester Project Manager
30 Church Street, Rochester, NY 14614
(585) 428-6852
