Lovely A. Warren, Mayor
Rochester City Council

City of Rochester

Police Chief Michael Ciminelli

RPD REORGANIZATION PLAN: 5-SECTION MODEL

In April 2015 Mayor Lovely A. Warren and Rochester Police Chief Michael Ciminelli officially implemented the Rochester Police Department Reorganization Plan, returning officers to a neighborhood beat structure so they can engage in true community policing activities.

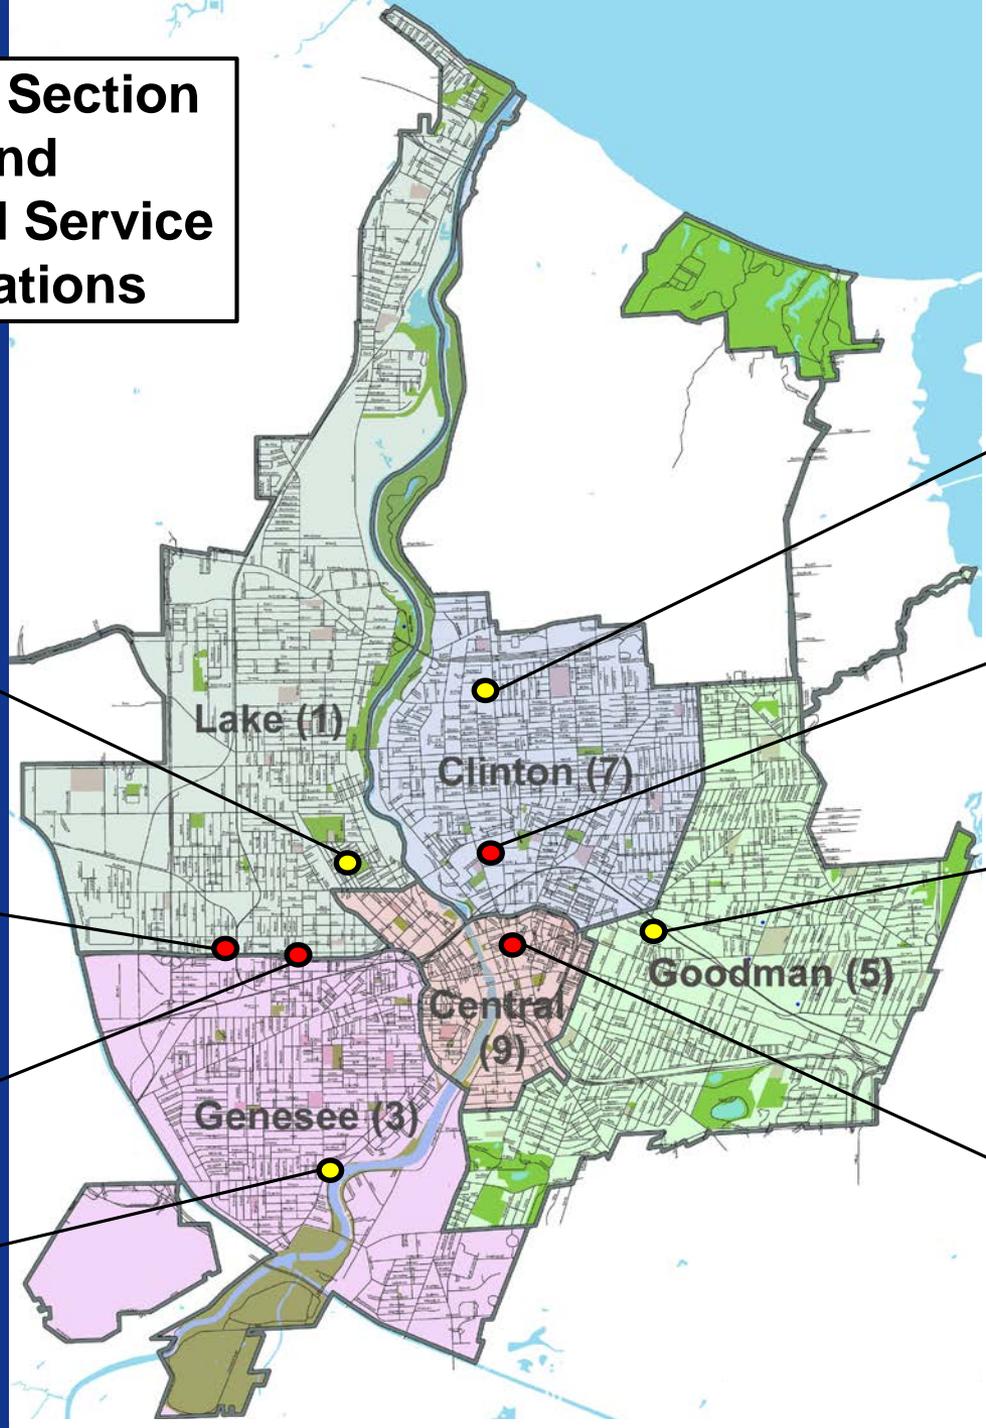

In March 2017 the Patrol Division Reorganization evaluation was formally released:

- New five-section patrol model is working successfully and analysis used to determine section and car-beat boundaries was accurate.
- Overtime hours driven by personnel shortages and response times declined, as did citizen requests to speak to a responding officer's supervisor.
- Work load among most of the car beats is evenly distributed and majority of service calls are answered by the patrol officer assigned to the beat of the caller address.
- Rates of Part 1 crime, those determined by the FBI to be the most serious, declined.

The 2017 evaluation provided confidence that the Section boundaries and car beats were established correctly and the RPD could now start making the capital investments to identify sites and locate offices in each section.

DES ARCHITECTURAL SERVICES ARCHITECTURAL PROGRAMMING AND SITE SEARCH

Assistant City Engineer Holly Barrett P.E.

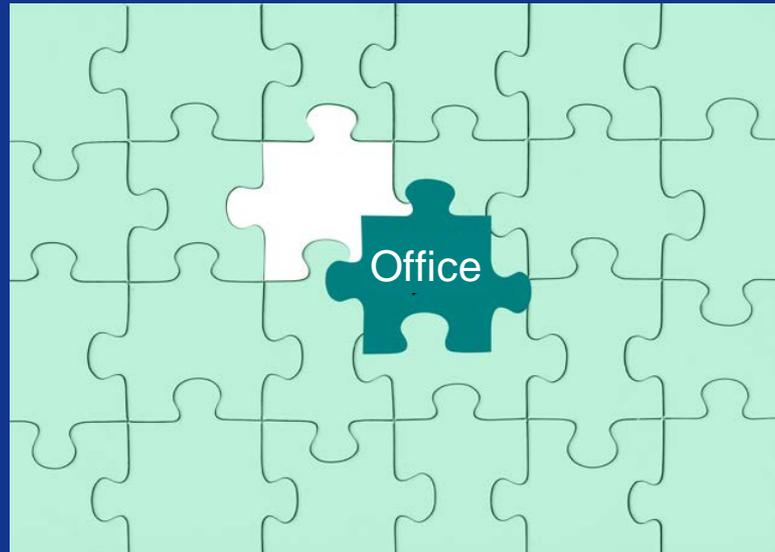

City of Rochester DES Architectural Services has been charged with engaging an architectural firm to assist with establishing program requirements and identifying potential sites.

PROJECT TEAM

- **Mayor Lovely A. Warren**
- **Rochester Police Chief Michael Ciminelli**
- **Deputy Chief Scott Peters**
- **DES Commissioner Norman H. Jones**

- **City Engineer Kamal Crues, P.E.**
- **Assistant City Engineer Holly Barrett, P.E.**
- **City DES Architect Lillian Forte, R.A.**
- **Architectura P.C. (City WBE)**
- **Highland Planning L.L.C. (City WBE)**

The programming established the minimum requirements for operational needs, staffing and parking criteria. We then looked at locations throughout the City grid to fit the requirements, much like a piece in a puzzle!

Minimum Facility Design Criteria

Total 3.0 – 3.5 Acres of site required for:

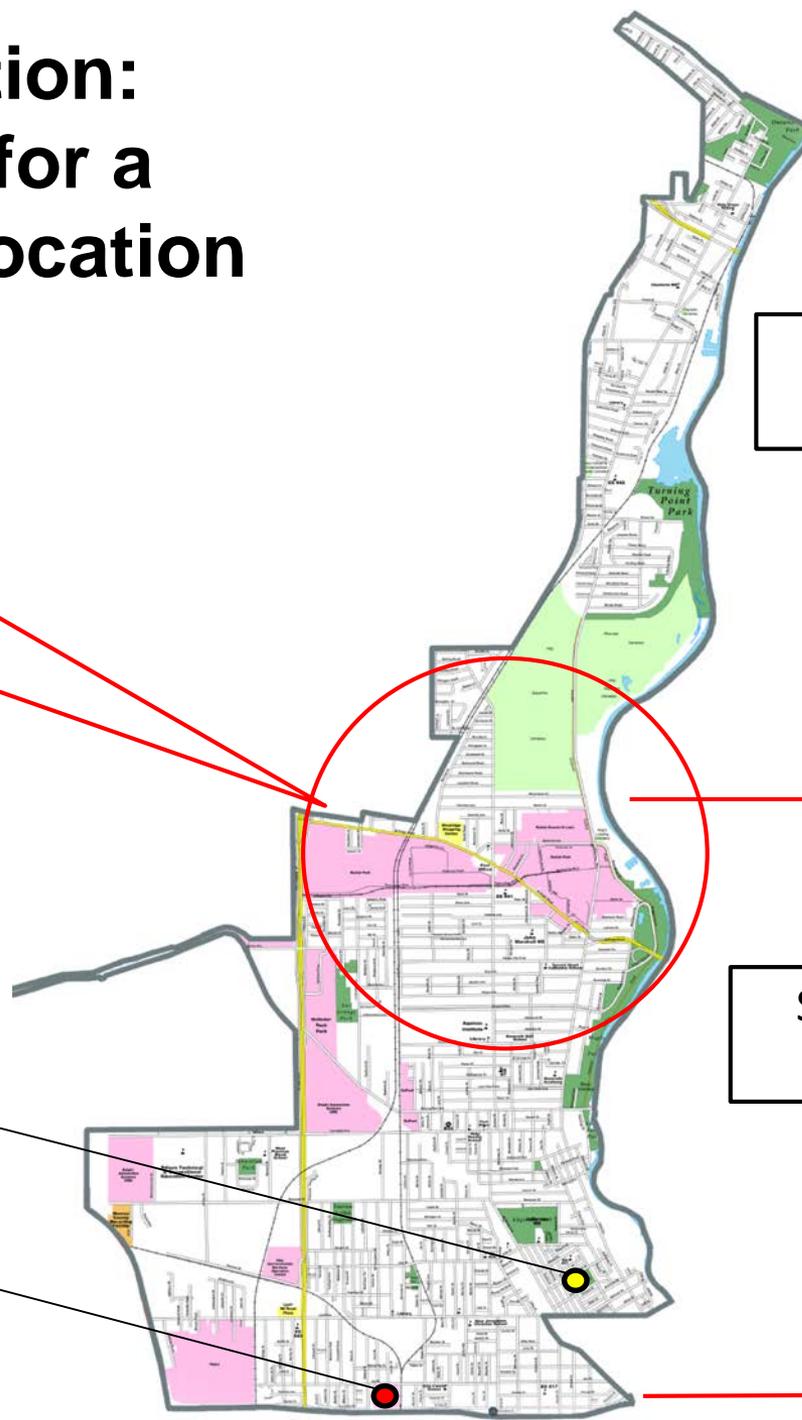

- New two-story 18,000 square foot building for RPD and NSC (total number of people):
 - Administrative Offices for 6 NSC staff & 113 RPD staff
 - Public Service Counters / Lobby
 - Community Room
 - Patrol & Investigations Work Areas
 - Locker Rooms & Support Spaces
- Parking and green space:
 - Public sidewalks, green space, bike racks, public benches & tables
 - Approx. 153 Parking Spaces, 35 – Public, 42 – Patrol Vehicles, 70 – Personal Vehicles (including shift changes), 6 – Office Staff
 - Multiple entrances & exits for RPD, public parking & pedestrian areas
 - Snow Storage

Lake Section

To facilitate implementation of the RPD 5-Section Model, over 25 different locations within the Lake Section have been reviewed.

The goal was to find a centrally located site that met the acreage and operational needs.

Over 25 different sites reviewed

Through this process the City identified two vacant lots on the northeast corner of Lake Avenue and West Ridge Road (formerly Piehler Pontiac) as the best location for the following reasons:

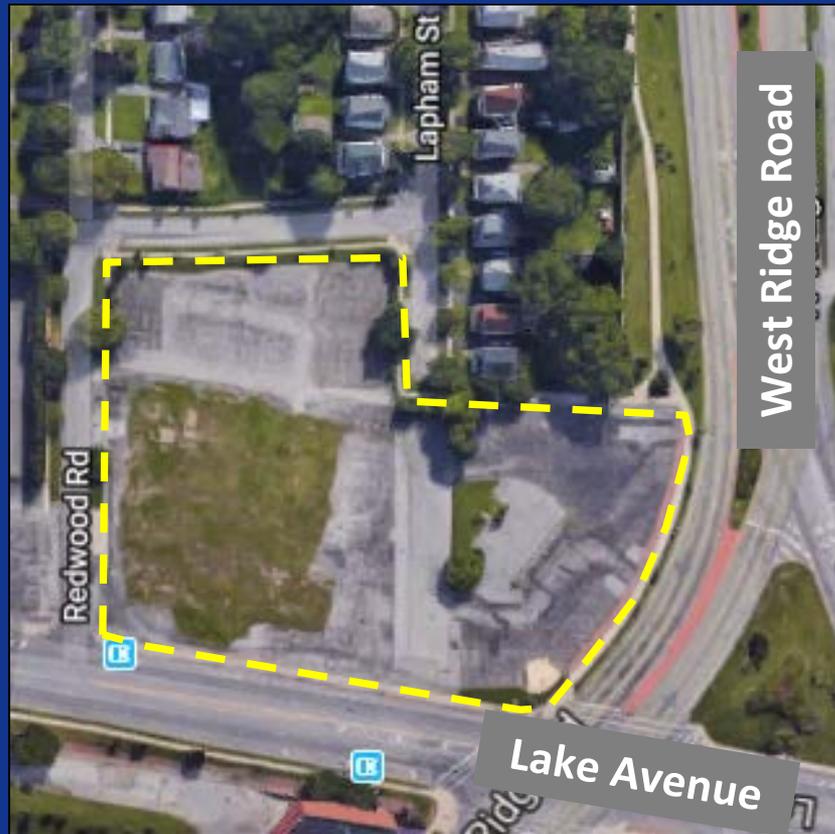

- Centralized location for Section Office & NSC
- Located at a major intersection with bus service
- Ample space for both the facility and parking
- Readily available and does not require any demolition
- Provides a significant use for lots vacant for 24+ years

City Council approval will be sought this fall for purchase of the property.

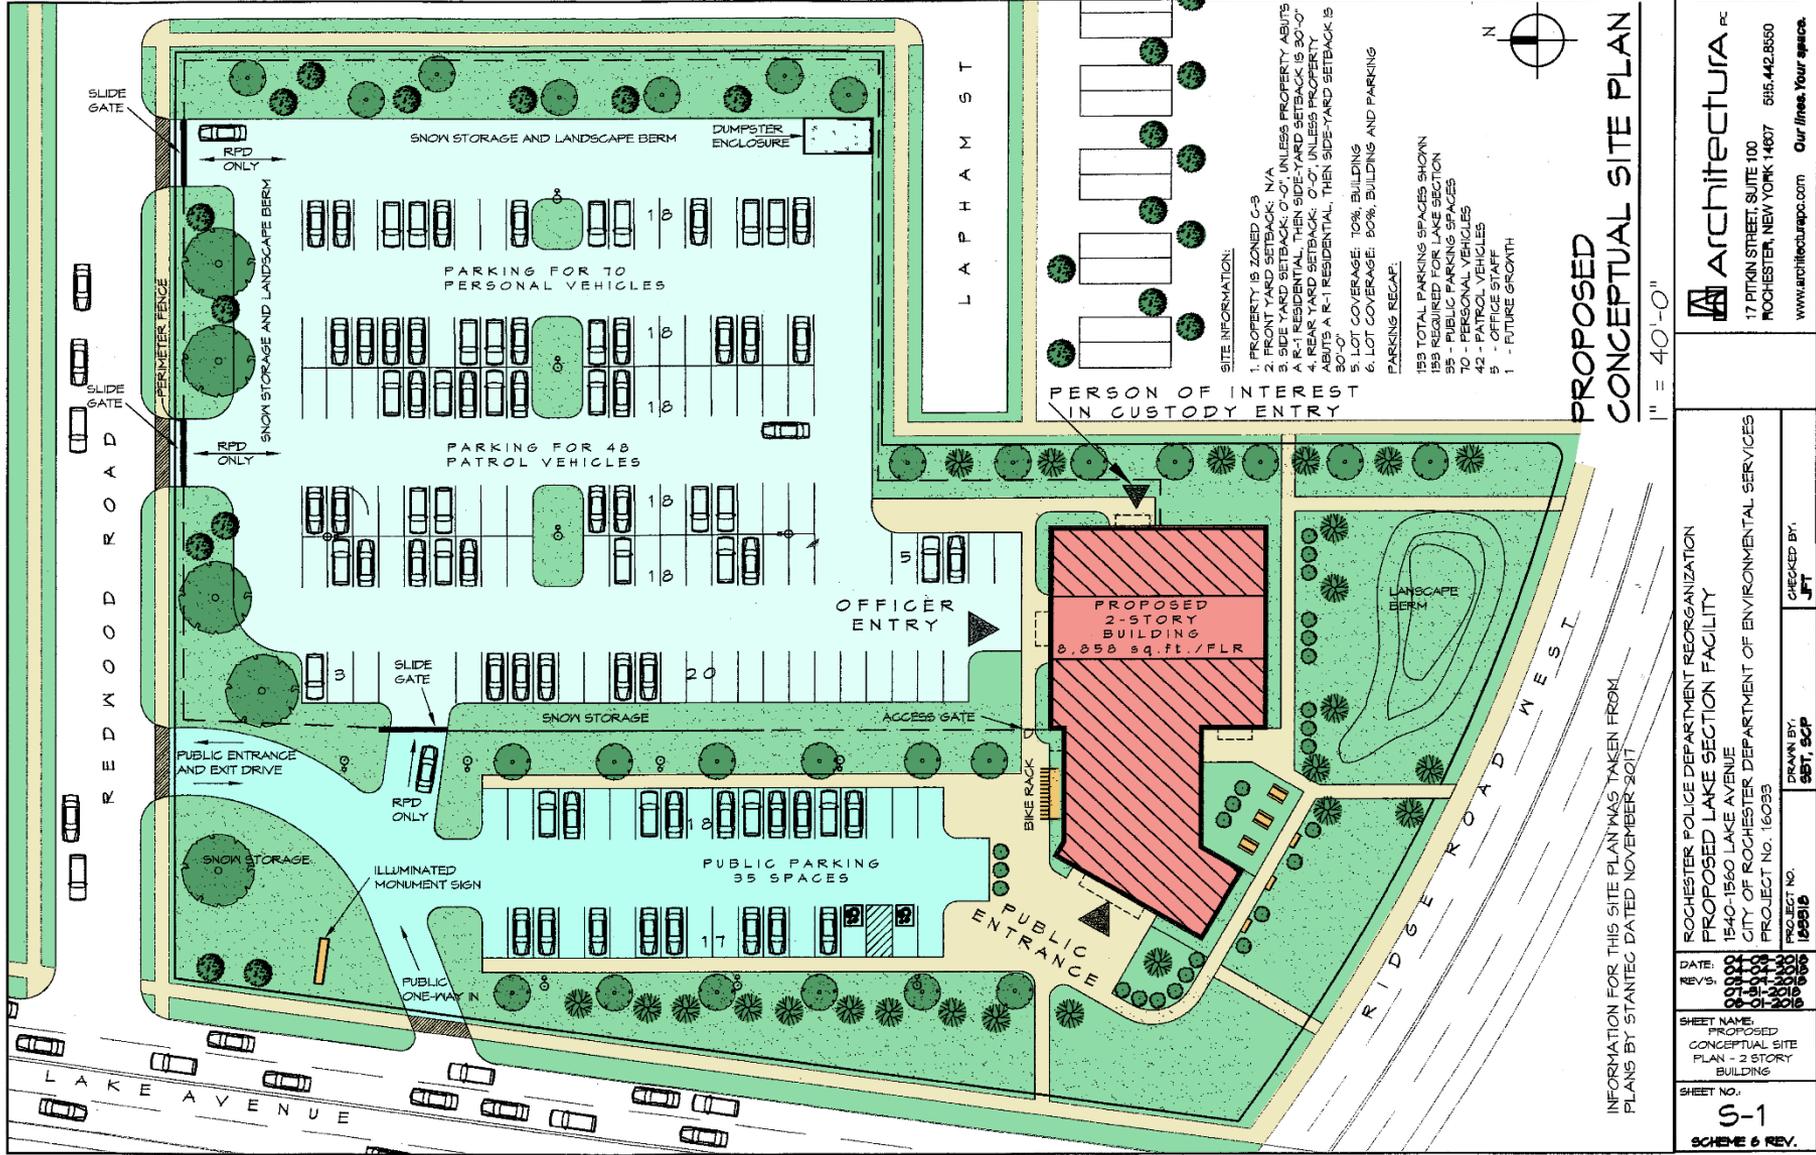

Proposed site
1540-1560
Lake Avenue

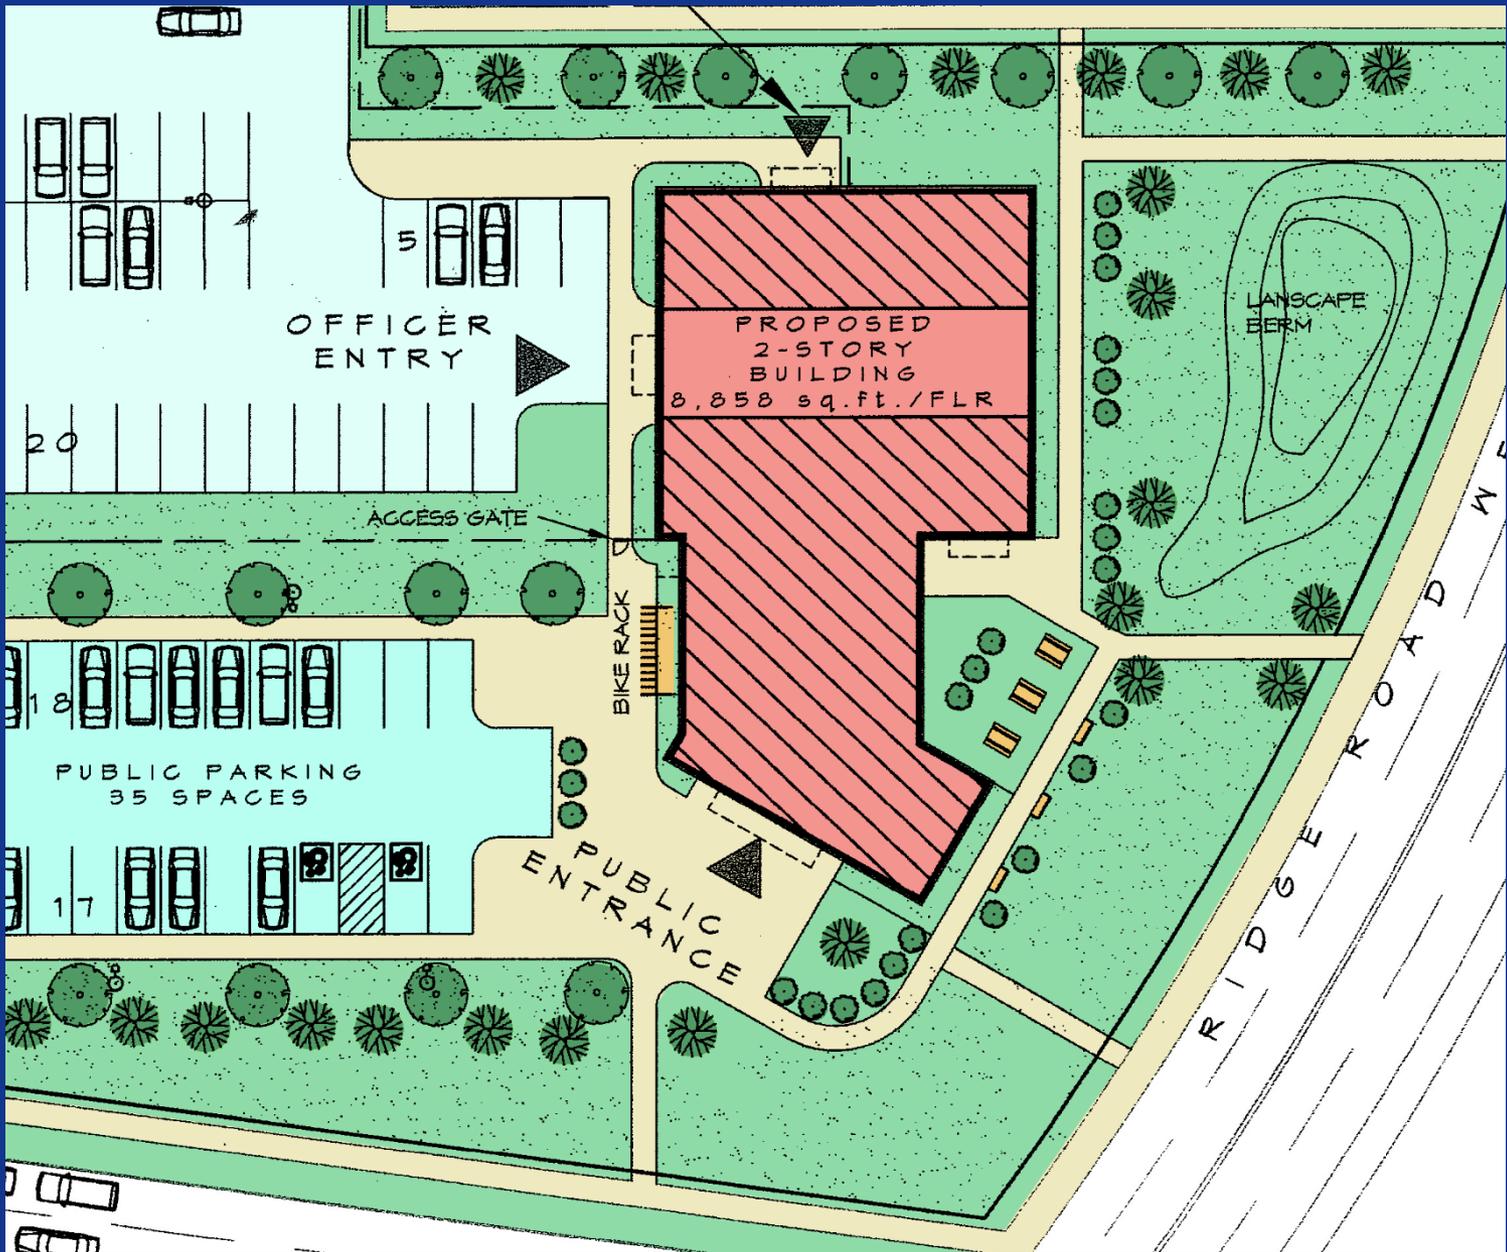

An early schematic site rendering has been created to convey the relocation concept for this site. We are holding this meeting today to obtain feedback on this concept.

Early concept rendering for 1540 - 1560 Lake Avenue:
