

What is the Heritage Trail?

Explore Rochester's rich and varied history on the Heritage Trail, a 1.25-mile long walking path that leads visitors to 15 points of historical significance. Along the way, visitors will learn the stories of our great city through historical markers, plaques and interpretive signs that detail how Rochester came to be and the national impact of some of the events that took place here.

Where is the Heritage Trail?

The trail runs approximately between the Susan B. Anthony House (17 Madison Street) on the west side to the second Erie Canal Aqueduct Bridge (50 West Broad Street) on the east.
