FILE NO.: SHEET OF

1. Aerial and below ground utilities are not shown on this plan. Refer to other plans for this information. Locations shown on the plans are approximate and are not guaranteed. The Contractor alone shall be responsible for determining the exact horizontal and vertical location of all structures and utilities in the path of, closely parallel to, and below the elevation of the proposed work.
2. The Owners of the various utilities will field locate and mark the approximate location of their facilities. It is the Contractor's responsibility to notify the various utility owners in ample time for them to relocate their facilities. (UFPO Stakeout number is 1-800-962-7962).
3. The Contractor shall perform work required to verify all existing invert elevations of existing utilities prior to the start of construction at no additional cost to the Owner. Gravity flows shall be maintained for all existing storm and sanitary facilities.
4. The Contractor shall adjust existing valve boxes to grade. Frames and valve boxes damaged by the Contractor during excavation or adjustment shall be replaced by him at no additional cost to the Owner.
5. Highway drainage shall be maintained throughout the period of construction.
6. Safe and continuous through traffic and ingress and egress for private driveways, service roads, and public streets shall be maintained at all times-throughout the period of construction. Two-way traffic shall be maintained at all times throughout the period of construction.
7. The Contractor shall meet the requirements of the City of Rochester for all construction signs, barriers, temporary lane closures and detours used on this project.
8. All signs within the contract limits are to be maintained and relocated by the Contractor, the cost of which shall be paid by the Contractor.
9. Property and right-of-way lines shown on the plans are taken from records and are not guaranteed.
10. The Contractor shall locate and preserve all survey monuments including property pins and markers. Those disturbed by construction activities shall be replaced by a licensed Land Surveyor. All costs shall be borne by the Contractor.
11. The existing pavement and concrete sidewalks shall be saw cut prior to any excavation. The cost for saw cutting shall be included in the price bid for the various bid items.
12. The existing granite curb shall be reset prior to construction of the new sidewalk. Existing granite in lengths less than 3 feet shall be replaced with new granite of equal dimensions to the existing material.

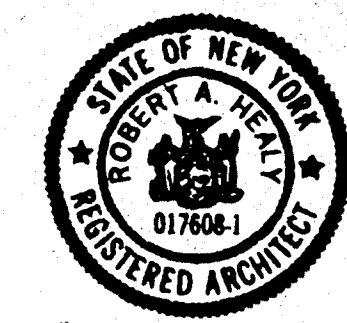

1. Remove existing granite curb to backside of concrete sidewalk.
2. Remove existing parking meter and return to City of Rochester. Cut existing meter pipe stand to grade and fill complete with concrete. Refer to 6.
3. Remove existing trees, granite planter and concrete service walks, typ.
4. Remove existing electrical service, including panel box and pole.
5. Remove existing building foundations. Note: Refer to parking structure foundation plans and details for excavation and backfill requirements (typical).
6. Remove existing lighting including poles, pole bases and service wire and conduit.
7. Remove existing asphalt parking lot. Refer to note 5.
8. Existing building to be demolished. Refer to specification. Refer to note 5.
9. Remove existing tree and cast iron planter grate. Return grate to City of Rochester.
10. Remove existing driveway cuts.
11. Remove existing concrete retaining wall. Refer to note 5.

It is a violation of the New York Education Law, Article 145 Sec. 7209, for any person, unless he is acting under the direction of a licensed professional engineer or land surveyor, to alter an item in any way. If an item bearing the seal of an engineer or land surveyor is altered, the altering engineer or land surveyor shall affix to the item his seal and the notation "altered by" followed by his signature and the date of such alteration, and a specific description of the alteration.
