

NUMBER 14.2

FLEET MANAGEMENT POLICY / PROCEDURE

SUBJECT: Federal, State and Local Clean Air Requirements are Met

APPROVED:

Michael Quattrone, Fleet Manager

PURPOSE: Document that all federal, state, and local clean air requirement are met

PROCEDURE: There is currently a three year schedule for inspection of fuel tanks. At the last inspection, March 2009, the fuel dispensing / operation was found to be in violation although there was no problem found with the tanks themselves.

The entire station is scheduled for replacement, with construction to begin in September 2011 and end January 2012. The Department of Environmental Conservation is aware that the compliance issue will be resolved with the start up of the new station.
