NOTICE OF INTENT TO SOLICIT BIDS

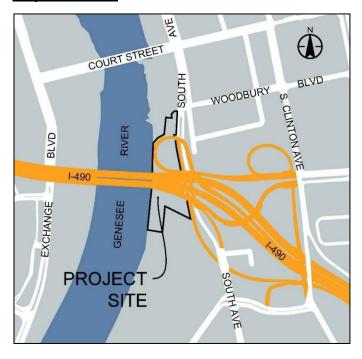

The City of Rochester, NY hereby provides notice of the intent to solicit bids for the construction of phase one of the ROC City Skate Park. The project will require qualified contractor(s) who can show experience in specialty skate park construction and can meet New York State Department of Transportation (NYSDOT) requirements for Minority/Woman-Owned Business Enterprise (M/WBE) participation.

Project Description

The ROC City Skate Park will be an inclusive, wheel-friendly, public skate park on NYSDOT property below I-490 and the Frederick Douglass-Susan B. Anthony Memorial Bridge. Located alongside the existing Genesee Riverway Trail, the skate park is imagined as an urban park that will enhance the outdoor recreation experience for walkers, joggers, and cyclists while maintaining a connection to the waterfront and other parks in the area. This custom-concrete skate park will boast multiple wheel-friendly features such as a main skate promenade, miniramps and ledges, and a competition bowl.

Phase One is projected to be 12,000 – 15,000 SF. In addition to custom concrete skate features, the project will include soil removal/disposal and site grading, as well as installation of utilities, site walls, railings, asphalt trail surfacing, site furnishings, lighting, and plantings. Soil removal and disposal will involve regulated waste (approximately 25% direct fill, 75% daily cover). Hazardous waste removal is not anticipated. See drawings for more information.

Anticipated Project Schedule

The ROC City Skate Park is currently in the design development phase. However, the project details may change as the detailed design is finalized. The City of Rochester reserves the right to change the design from what is shown in the attached drawings.

Groundbreaking is planned for fall 2019. Winter shut down will be required, with the majority of construction happening in spring/summer 2020. Substantial completion is projected for late summer/early fall 2020. Approximately 6-7 months of construction are anticipated for this ROC the Riverway project.

Bid Advertisement Late June 2019
Bid Opening Late July 2019
Award October 2019

Notice to Proceed Early November 2019

Qualifications Required

The Bidder and/or its Subcontractor(s) must demonstrate previous specialty skate park construction experience. This qualification is required for specialty skate park items only. Other work normally performed by a general contractor (site grading, drainage, paving, concrete flatwork, landscaping, site lighting, etc.) that is considered site work does not require qualification. The City of Rochester, NY will require certified supporting data in order to determine whether the Bidder and/or its Subcontractor(s) have the requisite specialty skate park construction experience.

Required experience includes: A) three public concrete skate park facilities constructed in the last five years with a minimum skating area of 12,000 square feet that are open and in good operating condition for at least one year, including one that is in area with a climate comparable to Rochester, NY; B) a list of all concrete skate park construction projects that are in progress (with a construction agreement) or which are complete but have been open and in operation for less than one year; and C) the shotcrete construction process shall be performed by an ACI-certified Shotcrete Nozzleman (Wet-Mix Process).

M/WBE Utilization

NYSDOT requires 25% M/WBE participation in construction projects (10% MBE and 15% WBE). Subcontractors can be utilized to reach this goal.
