

## AGENDA

### BRECK STREET IMPROVEMENT PROJECT PUBLIC INFORMATIONAL MEETING

#### BRECK STREET (PALMER STREET TO HERKIMER STREET) PALMER STREET (BRECK STREET TO EAST MAIN STREET)

**DATE:** December 19, 2019

**TIME:** 6:30 P.M.

**LOCATION:** RTS - Administration Building (1372 East Main Street)

I. Introduction

City of Rochester, Department of Environmental Services:  
Dominic Fekete, Managing Engineer/Street Design Division  
Lisa Reyes, Engineer III/Street Design Division  
Javier Vargas, Engineer II/Street Design Division

II. General Project Description

- Breck Street widening by 2 feet from 22 feet to 24 feet
- Palmer Street will not be widened - to remain 24 feet wide
- New granite curbing with underdrain system
- New driveway aprons to legal driveways; driveway apron removals to illegal driveways and vacant parcels (illegal driveway letters sent to owners – see below)
- Removal of carriage walks to properties with driveways; replacement/installation of carriage walks to properties without driveways
- Drainage improvements to include new catch basin installations
- Some relocations of existing light poles impacted by the Breck Street widening
- Hazardous and asphalt covered sidewalk replacements
- Three (3) tree removals (39, 92 and 155 Breck St); 2 are due to poor condition and will be removed ahead of the project by City Forestry (92 & 155 Breck St); replacement trees to be installed
- Restoration of all disturbed areas affected by the construction
- Existing alternate side parking regulations will remain

III. Illegal Driveway & Encroachment Letters:

- *Illegal Driveway Letters:* owners of the following Breck St. properties were sent driveway letters dated December 6, 2019: 10-16, 32, 94-96, 117-123, 135, 154-156, 155, 158-160, 208, 213, 224, 249, 274, and 278.
- *Encroachment Letters:* letters will be mailed out soon to property owners who have private items within the right of way (i.e. retaining walls, fences, shrubs/bushes, flowers, planters, paver stones, etc.).

IV. Utility Work

- *Water Bureau* – lead water service replacements to be completed prior to the street construction project.
- *RGE (Electric)* – some underground electric ducts will require replacement.
- *RGE (Gas)* – test pits will be performed to determine depth of services; some services may need to be lowered below the curb and underdrain.
- *Frontier* – concerns with relocating the existing utility pole at 288 Breck St out of the proposed driveway apron. Further coordination is required to determine a solution.
- *Spectrum/Charter* – similar concern as Frontier regarding utility pole at 288 Breck St. Test pits will be performed to determine depth of their conduits; conduit may need to be lowered below the curb and underdrain.

V. Maintenance of Traffic

- Two-way traffic will be maintained using flag persons when necessary.
- Some access disruptions during curb, sidewalk and driveway placement.

VI. Schedule

- Advertise Winter, 2019/2020
- Begin Construction Spring, 2020
- Complete Construction Fall, 2020

VII. Questions and Comments

VIII. Contacts

Javier Vargas, DES/Street Design Division – Design Phase
