

Eligibility Requirements for a Single-Phase (Residential) License

You must have 3000 hours of experience as an apprentice/electrician/electrical contractor within the past five years. You must meet this requirement as follows:

- At least 50% or 1,500 hours out of the total of 3,000 hours of hands-on experience installing and repairing electrical systems covered by the National Electrical Code.
- The balance of not more than 1,500 out of the total of 3,000 hours may consist of either of the following types of experience or some combination of the two:
 - Electrical course work in an accredited school, two-year or four-year college program or apprentice program.
 - Electrical estimating, design or supervision of work covered by the National Electrical Code.

Proof that you meet the requirements may be included as attachments

You may choose to provide attachments such as a resume, reference letter, diplomas, etc. These documents are not required for a complete application, although the Board may request to review them at any time. If you are self-employed, you must provide inspection certificates.

Requirement	Attachment	Employee	Self-Employed
Hours Worked	Reference Letters, Resume, etc.	Optional	Optional
Hours Worked	If work for Union Hall, then copies of hours of work (e.g. printout from union)	Optional	N/A
Proof of Work	Inspection Certificates	N/A	Required - 8
Education	Diplomas, Transcripts	Optional	Optional

Eligibility Requirements for a Master (Journeyman) License

You must have 6000 hours of experience as an apprentice/electrician/electrical contractor within the past ten years. You must meet this requirement as follows:

- At least 50% or 3,000 hours of the total 6000 hours of hands-on experience installing and/or repairing three phase electrical wiring, equipment, etc. covered by the National Electrical Code.
- The balance of not more than 3,000 hours out of the total 6,000 hours may consist of the following types of experience or some combination of the three:
 - A. Successfully completed electrical course work in an accredited school, two-year or four-year college program, or apprentice program.
 - B. Electrical estimating, design, or supervision of work covered by the National Electrical Code.
 - C. Work in the field as an apprentice/electrician/contractor installing and/or repairing single phase electrical wiring, equipment, etc. covered by the National Electrical Code.

Proof that you meet the requirements may be included as attachments

You may choose to provide attachments such as a resume, reference letter, diplomas, etc. These documents are not required for a complete application, although the Board may request to review them at any time. If you are self-employed, you must provide inspection certificates.

Requirement	Attachment	Employed	Self-Employed
Hours Worked	Reference Letters	Optional	Optional
Hours Worked	If work for Union Hall, then copies of hours of work (e.g. printout from union)	Optional	N/A
Proof of Work	Inspection Certificates	N/A	Required - 20
Education	Diplomas, Transcripts	Optional	Optional
