

STC 21. New York State Canal Corporation Permit Requirements

Contractors must apply for and obtain a Canal Work Permit and/or Canal Use and Occupancy Permit for any work in the Genesee River Corridor, and shall maintain the minimum insurance requirements naming additional insured as specified herein, in addition to the City's policies and procedures for public works construction contracts. In the event these requirements conflict with the City of Rochester's Standard Construction Contract Documents, as revised under section Supplementary Terms and Conditions, all requirements specified herein shall supersede.

1. The permit application is included in the appendix.
2. The Canal Corp permit requirements parallel many of the RG&E requirements noted under STC 19. The more stringent requirement will be adhered to for any conflicts that arise between the requirements in STC 19 and STC 21.
3. The Contractor will need a permit for any work within the limits of the river (on or within the waterway).
4. RG&E, in coordination with the New York State Canal Corporation, maintains levels within the Genesee River in support of hydropower generation and compliance. However, these entities cannot and will not guarantee the level, rate or condition of flow of the Genesee River during the project. The rate and/or level of flow in the Genesee River is subject to upstream conditions and facilities that are outside of their control.
5. The project shall be performed and coordinated pursuant to the following communication protocol:
 - a. The LICENSEES shall provide and maintain at all relevant times an on-site supervisor as a point of contact at all times during the work within or in proximity to the river.
 - b. The LICENSEES shall notify Canal Corp at the start of each work shift prior to entry into the river, or areas in proximity to the river.
 - c. The LICENSEES shall notify Canal Corp upon completion of the work within, or in proximity to the river during each shift.
 - d. The LICENSEES shall notify Canal Corp immediately in the event of any emergency.
 - e. The LICENSEES shall be prepared at all times to immediately demobilize/evacuate from the river and areas in proximity to the river in the event of an emergency, and shall immediately do so upon notice from Canal Corp.
6. The Contractor and any subcontractors who are working on the Canal Corp right of way and/or is present on the Canal Corp right of way must provide a Certificate of Insurance in the amount of \$ 2,000,000 CGL naming as additional insured's: The People of the State of New York, The New York State Power Authority, and The New York State Canal Corporation. In addition, all parties that will be working on the right of way must provide NYS Workmen's Compensation and NYS Disability Certificates (C105.2 & DB120.1) or equivalent.
