

EXTINGUISHING GREASE FIRES

Built up grease catches fire easily. Wipe appliance surfaces after spills and clean stove surfaces, ovens, and appliances regularly. An appropriate sized lid should be kept near the stove to cover and smother any grease fire contained in a pan. Baking soda can also be used. NEVER use water to extinguish a grease fire.

Please feel free to contact the Rochester Fire Department's Community Risk Reduction Unit with any fire related questions at (585)428-1362.
